

The Northern Region Emergency Response Planning Tool - Decommissioned

Healthpoint and the northern region wish to inform you that after **14 years**, a difficult decision has been made to **decommission** the emergency planning software, which you accessed from www.healthpoint.co.nz with a unique username and password.

What does this mean for you?

1. **End of Support:** Starting from the decommissioning date – 31st July 2024, The platform and all information will be destroyed and no longer accessible.
2. **Data Migration:** If your practice or PHO have an existing plan we recommend publishing a final copy prior to the end of July and storing this in an appropriate location.
3. If you require help accessing your plan or downloading a copy, please email: info@healthpoint.co.nz and include in the subject line 'Help accessing my ERP'

Healthpoint appreciates your trust and support over the years in using the ERP to build your online emergency response plan.

Important considerations

This decision in no way diminishes the importance of Business Continuity & Emergency Planning. We encourage you to take this opportunity to revisit and review your Business and Emergency Planning. Healthpoint will assist you in retrieving the information you have developed. Once you have downloaded your plan PDF, here are some considerations:

- Storage: Where will your plan be stored in the future?
- Review and Update: How will the plan be regularly reviewed and updated? What is the scheduling process?
- Format: Will you continue with the same format or migrate the information to a different template?

HNZ BCP/Emergency Preparedness Workshops:

Health NZ is able to offer a limited number of two-hour workshops across the Auckland region to help primary care and community health providers build awareness and resilience in the event of a disaster.

To register an interest in attending one of these workshops, please send through your details and we'll let you know when the next one is available in your area.
